# Forum concept

Approving the 2015 Agenda in the region sustainable development until 2030, UN member states commit provide sustainable, inclusive and progressive growth, social integration and environmental protection, being in partnership and in peace.

Russia needs to achieve a result ensure effective interaction state, business, public and science in the search and implementation of approaches to building our prosperous common of the future.

Without success criteria and tools measuring efforts towards Goals will ineffective.

Forum «Common Future» – a platform for discussions and presentations of successful cases, developing proposals for effective meeting the objectives of the Agenda and achieving Sustainable Development Goals.

## Background of occurrence Sustainable Development Goals

In 1987, the World Commission on Environment and Development introduced the term "sustainable development" into widespread use.

In 1992 at the UN Sustainable Development Conference in Rio de Janeiro 179 states approved "Agenda 21".

In 2000, the General Assembly UN in New York by 147 heads of state and representatives of 189 countries Millennium Development Goals adopted.

To develop a global plan actions to achieve these goals By 2015, an independent advisory body to the United Nations Development Program (UNDP) was created.

In 2005–2010 reports prepared on the socio-economic development of Russia with the support of the UNDP Office in Moscow.

In 2012, 192 Heads of State revised "Agenda 21" and adopted a new document, "The Future, which we want."

In 2015, UN member states reached consensus on the outcome of the new agenda, Transforming Our World: An Agenda Sustainable Development Day for the period until 2030.

of the Most Beautiful  
Villages and Towns  
in the World

In 2015, 193 countries embarked on a sustainable development trajectory, which by 2030 should lead to better welfare of all the inhabitants of the planet. At the Summit on Sustainable Goals

In 2019, Heads of State and Government announced the “Decade of Action and Accomplishment for Sustainable Development”. Solving the problems of our time requires great resources and joint efforts. Annual exchange of experience, replication of best practices and knowledge can accelerate the process of achieving the Sustainable Development Goals and contribute to sustainable development society.

In 2015, Russia, like other countries, accepted the obligation to follow the developed at the UN principles of sustainable development and creates national mechanisms that contribute to the achievement of 17 goals. So, for each national development goal, a plan for its achievement is formed. A particular role is played by the effectiveness of the monitoring system of indicators, capable of objectively measure progress towards goals. Indicators are also important for the preparation of the Voluntary National Review of Sustainable Development Goals in Russia, which will be presented in the summer of 2020 as part of the political forum on sustainable UN development.

**?** What is the role and contribution of each of the participants in the sustainable development process: governments, business, civil society and academia? How are sustainable development indicators integrated into national strategic documents? How can businesses effectively move from endorsing and supporting the SDGs to actually integrating the Goals into their business strategy? How can businesses take advantage of the new opportunities that come with the adoption of the UN Sustainable Development Goals?

---
